

## ProfitInfo

Indicator ProfitInfo is a trading system for platform Metatrader4. The system was developed on Metatrader 4 Version: 4.00 Build 628.

ProfitInfo is an indicator to show in one window opened buy and sell trades of defined symbols and systems.

It is best to use a forex cash back service. Not only for this system, but generally it is good to take some cash back from spreads you paid. I use and recommend [CASHBACK forex](#) service.

SortBySymbol = false  
trades are separated  
by magic number

SortBySymbol = true  
trades are separated  
by symbol

### 1. Instalation

Copy file **ProfitInfo.ex4** in the directory *experts* where you have Metatrader4 installed (eg.: *C:\Program Files (x86)\MetaTrader4\MQL4\Indicators\ProfitInfo.ex4*).

### 2. Settings

#### 2.1. MagicNumber

Define which magic numbers should ProfitInfo show. You can specify one or more magic numbers. For more magic numbers separate them with a comma “,”. If you set it to “ALL” without quotes, the system will count profit of all magicNumbers.

#### 2.2. Symbols

Define which symbols should ProfitInfo show. You can specify one or more symbols. For more symbols separate them with a comma “,”. If you set it to “ALL” without quotes, the system will count profit of all symbols.

#### 2.3. Clr\_1, Clr\_2, Clr\_3

Color settings for indicator.

#### **2.4. Font**

Font setting.

#### **2.5. FontSize**

Font size setting.

#### **2.6. Correction**

Correction of the table, if the words overlaps increase Correction setting, and opposite if the spaces are too big, decrease the Correction setting.
